

## Bacterclin

Bacterclin is a product destined to eliminate bacteria, mushrooms, acarids, mould and all of harmful organic elements to health.

The tests carried out within the hospital operating rooms demonstrated that the application of Bacterclin eliminates 99% of the bacteria normally present in an operating theatre. The bacteria are the main cause of the hospital-acquired infections.

Bacteria	Concentration (x105CFU/ml)	UV Light source OFF	UV Light source ON
		Elimination %	Elimination %
E.Coli	1.905	27.28	99.999
	1.905	40.98	99.999
	1.905	33.33	99.999
MRSA	1.605	27.28	99.999
	1.605	40.98	99.999
	1.605	33.33	99.999
Influenza Virus	1.07.5	60.19	99.987
	1.07.5	74.88	99.998
	1.07.5	49.88	99.995

Bacterclin is a product especially made for hospitals, medical private clinics, doctor's offices, schools, sports halls, swimming pools, public transport and in general all areas where a strong concentration of bacteria can be found.

The anti-bacterial activity of this product gives it an effect of environment deodorizer. In fact, the tests carried out within a laboratory indicate a fast elimination of smells caused by the presence of moulds and bacteria.

The product absorb and decompose odors and stinking materials.
